

# Thinking Ahead

## *"The future is green"*

### **The environmental policy**

The Environmental Policy sets out the Company's objective to maintain operational standards to protect the environment.

It confirms the company's commitment to the proper management and monitoring of waste, the reduction of pollution, compliance with environmental legislation, and relevant training of staff.

Protecting the natural systems upon which all life depends while lifting people out of poverty and advancing economic development are among the greatest challenges confronting humanity.

Adverse effects of operational activities will be minimised as far as practicable.

We at Iffin Farm house recognise we have a direct impact on the environment around us.

The objectives of the policy are:

- To comply with its legal obligations under the current Health, Safety and Welfare Act and the Environmental Protection Act Together with all other applicable statutory provisions and relevant codes of practice.
- To promote Health, Safety and environmental awareness throughout the organisation.
- To minimise the social impact of the company's activities and avoid damage to the environment through regular reviews of the business.

To demonstrate our commitment we use local produce where we can which reduces transport costs and in turn protects the environment from added fumes and supports local economy.

We recycle all our waste such as:

- Paper
- Plastic
- Re-using uncooked food as compost for the vegetable patch in the garden.
- Ink cartridges

We also use recycled products where possible.
